Chad Koslovsky

Full-stack engineering | Commerce that keeps working

Milliken, Colorado · chad@koslovsky.xyz

`Full-Stack Engineer, eCommerce Platform (Technical Lead) | Wild Fork Foods`

01 PROFILE

Full-stack product engineer combining React, Next.js and TypeScript with APIs, customer workflows and production operations. Built and supported a reseller application spanning marketplace data, pricing rules, subscriptions and billing, with long-term responsibility for the system behind the interface.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Own client products from workflow discovery through interfaces, APIs and production support. Build tenant-aware shared services and coordinate specialist contributions.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a reseller application joining marketplace data, user-defined pricing rules, accounts, subscriptions, billing and embedded support. Long-term client work began alongside FRII.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and production escalations, modernized workloads from Hyper-V and ESXi into Docker and Kubernetes, and ran SOC 1/SOC 2 audits.

Systems / Software Engineer · Office Evolution | 2014-2015

Built SQL/MongoDB applications connecting CRM, provisioning, onboarding and service operations across locations; translated cross-department handoffs into explicit workflows.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered SMB networks and endpoints, built diagnostic tools and handled on-call issues directly with clients.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported enterprise infrastructure, automated audit/backup workflows and coordinated cross-team changes.

03 SELECTED WORK

NuPrice | Rules-driven commerce operations · Long-term client engagement | 2019-2021

Built and operated the reseller application, from marketplace inputs and pricing decisions to subscriptions, billing and customer support. Connected product delivery with sustained technical ownership.

Technomancy | Connected client operations · Founder-built platform | In development

Building TypeScript/Next.js/PostgreSQL software connecting support, CRM, scheduling and billing through tenant-aware services. Added versioned container delivery, health checks and restore-verification tooling.

Office Evolution | Cross-team workflows · Employment project | 2014-2015

Built SQL/MongoDB applications connecting CRM, provisioning, onboarding and service operations across locations. Worked with the CEO and CIO to make departmental handoffs explicit.

04 CAPABILITIES

React, Next.js and TypeScript interfaces · Node.js, REST APIs and connected business workflows · Marketplace data, pricing rules, subscriptions and billing · CI/CD, Docker, Terraform and production troubleshooting · Tenant-aware authentication; clear technical and client communication
